FRONT END DEVELOPER

March 2023 - August 2023

- Built a lot of companies AI-focused web projects from scratch to scalable products
- I was responsible for building the interfaces of both the web applications as well as the mobile applications.
- The tech stack, I was using during my time in the company is ReactJS, React Native and Sass
- During the internship, I also got in touch with some backend code and was fascinated by it. So I dived into learning backend which now helps me build full-fledged all rounded web apps
